

# Taras Labiak

PHP, Node.js, Python Full Stack Developer

Age: 29

Email: [kissarat@gmail.com](mailto:kissarat@gmail.com)

Location: Lviv, Ukraine

Phone: +380671541943

Experience: 3 years

Skype: taradox89

Facebook: [www.facebook.com/kissarat](http://www.facebook.com/kissarat)

Website: [kissarat.github.io](http://kissarat.github.io)

## Summary

---

Software designing and architecting, PHP, JavaScript/ES6, Python, C, C++, C#, Java, Go, Solidity, ERC-20, Bash, SQL, HTML, SVG, SCSS, SASS, CSS, Bootstrap, Semantic UI, Vue.js, React.js, jQuery, Marionette.js, webpack, Gulp.js, Node.js, Electron, express.js, strapi, Stripe, knex.js, Meteor, REST/HTTP, WebSocket, WebRTC, Yii 2, tornado, NoSQL, PostgreSQL, MySQL, MongoDB, Mongoose.js, IndexedDB, Redis, AWS EC2, .NET, WPF, Silverlight, Git, Mercurial, Docker, Nginx, Linux web server configuration, macOS workstation, MQTT, Bitcoin, Ethereum (parity) node configuration and usage through API, MVC, MVVM, Design pattern

## Experience

---

### Indeema

**Position:** Web Backend Developer

**Company website:** <https://indeema.com/>

**Technologies:** Node.js, strapi 3, express.js, Stripe, Ethereum Solidity (ERC20), AWS EC2, MQTT (AWS IoT Core), MongoDB (Mongoose), microservices, AWS S3, AWS SES

**Responsibilities:** Developing architecture and implementation of backend on Node.js, MongoDB

**Duration:** 6 months

**Projects:** [ubreez.com](http://ubreez.com), [synqiubique.co](http://synqiubique.co) (support), [wasihub.com](http://wasihub.com)

### Ocean of Ethereum

**Position:** Full Stack Web Developer

**Technologies:** PHP 7.2, Yii 2, PostgreSQL 10, Vue.js, Ethereum parity API

**Responsibilities:** Implementing business logic, database design, frontend part. Integrating with Ethereum node API (parity).

**Since:** 8 months ago

### Antikvar Plus

**Position:** Full Stack Web Developer

**Technologies:** PHP 7.2, Yii 2, PostgreSQL 9.6, Vue.js, SCSS, jQuery, block.io API, Ethereum parity API, Payeer API, Perfect Money API, AdvCash API

**Responsibilities:** Business logic implementation, database design. Integrating external payment API.

**Duration:** 3 months

### ICO Holding

**Position:** Full Stack Web Developer

**Technologies:** PHP 7.1, Yii 2, PostgreSQL 9.6, Vue.js, Bootstrap, HTML, CSS, jQuery, Perfect Money API, AdvCash API, Payeer API, block.io API, Ethereum parity API

**Responsibilities:** Implementing business logic, database design, frontend part. Integrating external payment API.

**Duration:** 4 months

## MLBot for Skype

Massive (and periodic) message sender, importing and adding contact list, automatic deletion of contacts. The backend is implemented on Node.js and PostgreSQL, the frontend is made using Electron, React.js.

## Evert Social Network

The social network. Node.js + Marionette.js <https://github.com/kissarat/evert-social-network-node.js> and on Meteor.js + React <https://github.com/kissarat/evert-social-network-meteor>.

**Duration:** 10 months

## BestChoice Club

**Position:** Full Stack Web Developer

**Technologies:** PHP 5.6, Yii 2, PostgreSQL 9.4, Bootstrap, HTML, CSS, jQuery, Perfect Money API, AdvCash API, NixMoney API

**Responsibilities:** Implementing business logic, database design. Integrating external payment API.

**Duration:** 4 months

## IntelSCADA

**Position:** Full Stack Web Developer

**Technologies:** Python 3, tornado web framework, SVG

**Responsibilities:** Implementing editor for building sensors viewer

**Duration:** 4 months

## Education

---

2006 - 2011 Bachelor's degree, Computer Systems and Networks | Ternopil Ivan Pul'uj National Technical University

2002 - 2006 High school degree | Technical Liceum

## Own Projects

---

### Auxiliary

Utilities NPM package (like lodash) <https://www.npmjs.com/package/auxiliary>

### Never Loose

Google Chrome extension (<https://github.com/kissarat/never-lose>) that makes snapshots at archive.org of any pages every visit

### Dominant

Google Chrome extension (<https://github.com/kissarat/dominant>) for commenting any element of any HTML page. User can see comment of other users

### prom.ua JSON gateway

Gateway, that accepts any URL of prom.ua, parse appropriate page and respond in JSON format <https://github.com/kissarat/prom>

## Code Commenter

Web application for commenting of lines of Python code with own syntax highlighter

<https://github.com/kissarat/coco>
